6 months

Maksoft Rewa ➡ Full-time | NOV 2022 -

Full stack developer – react js | node js | MySQL | mongo db

Projects

React E- ecommerce website:

- made a e- ecommerce project using react, in this project has all the functionality that should be in a e- ecommerce project, like sorting, filtering, and search the projects and add to cart functionality. I have used Context Api as a global store. while this project a lot of problems faced, but I solved all the problems and completed the product.
- Live Link: E-commerce

Mern stack student grievance redressal portal:

- made a student grievance redressal portal where student can report an issue/grievance on the portal once student get registered and approved by the admin. and admin can resolve the the grievance or reject.
